DETAILED ACTION

Remark

1. Claims 1-11 was canceled. New claims 12-17 are added and pending for examination.

Allowable Subject Matter

2. Claims 12-17 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Ozukturk fails to teach or suggest a channel estimation apparatus and its corresponding method as newly presented of claims 12 and 17. Ozukturk fails to disclose the features recited in claim 12 of: (1) an estimator that estimate the response of a channel using a data signal included in a received signal, (2) a calculator that calculates the reliability of a temporary decision value, which is based on the data signal and a channel response estimate of a pilot signal within the received signal, to produce a weighting coefficient, (3) a multiplier that multiplies the channel response estimate for the data signal by the weighting coefficient to produce a weighted channel response the data signal, and (4) a combiner that combines the weighted channel response estimate for the data signal with the channel response estimate for the pilot signal to obtain a combined channel response estimate. Ozukturk does not disclose estimating the channel response of a data signal and does not disclose a tracking means 607 that tracks both data and pilot signals within a received signal. Instead, Ozukturk discloses estimating the channel response of only a pilot channel and tracking only the synchronization between the code sequence of the received pilot signal and that generated locally in generator 608.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Thomas et al, Kuchi et al, and Shen (PTO 892 attached) disclose systems related to channel estimation with different approaches.
